

Smart Advantage Purchasing Program

If you are looking for a smart approach to manage your purchasing program and drive NOI, then look no further! The Buyers Access Smart Advantage Purchasing Program supports customers to drive standardization, compliance, and deliver customized solutions that provide significant benefits and savings to your company. Our comprehensive program contains five key components that include: Vendor Consolidation, Program Implementation and Engagement, Product Standardization, Commerce Automation, and Professional Support. All components work simultaneously together in order to maximize the benefits of your purchasing program.

Smart Advantage Purchasing Program

Vendor Consolidation

Our team members negotiate lower prices with top suppliers, audit invoices to ensure you never pay more than these prices, and provide the cost-savings to all properties in your portfolio, regardless of size or location.

Program Implementation and Engagement

Buyers Access partners with our members to prioritize their needs, perform an in depth comparative analysis, guide the member through the vendor consolidation process, while identifying opportunities for maximum speed to revenue.

Product Standardization

Product standardization increases asset value and optimizes the efficiencies of your on-site personnel. Standardizing your products saves time, by receiving consistent product and pricing, reducing inventory, improving turn rates, and ensuring product availability.

Commerce Automation

Buyers Access continues to provide innovative solutions to make the multifamily industry purchasing experience easier. Our robust e-Commerce site allows for customizable and intuitive navigation. The site can be configured to meet the individual needs of Buyers Access Members and has the ability to work with each vendor's integration standards.

Professional Support

Buyers Access works hard to create and maintain awareness and compliance among our members, suppliers and vendors. We focus on consistent communication through training, endorsement letters, email reminders, purchasing guides, monthly reporting, executive summaries, surveys and more.
